OVERVIEW

LAPSTER

The Lapster is a portable advanced forensic laptop specifically designed to overcome the Limitations of on-field forensics. It is extremely fast than most of the Laptop workstations and can cater to most of the requirements for digital forensic experts.

It is configured and designed to handle complex forensic applications and also handle mobile forensics.

It is light weight, durable and fast which in becomes a complete budget solution for on-field forensics.

It's not just a laptop, as its capabilities are similar to workstation which can be used to run forensic applications with Write Blockers and 2 Hot swap Bays.

Lapster comes with 3 years warranty and lifetime support.

All our Systems are vertically scalable within their series.

TECHNICAL SPECIFICATIONS

Processor	Intel core i7 8 core
RAM	16 GB PC4-21300 Non-ECC LDDR4 SODIMM 2666 MHz (upgradable Up to 64GB)
